Numero 1  
Numero 2  
Numero 3  
Numero 4

Code:

```
import java.io.*;
import javax.servlet.*;
import javax.servlet.http.*;

public class MiServlet extends HttpServlet
{
    String[] contador = new String[100];
    int indice = 0;

    public void doGet(HttpServletRequest petition, HttpServletResponse respuesta) throws ServletException,
    IOException
    {
        respuesta.setContentType("text/html");
        PrintWriter salida = respuesta.getWriter();

        String titulo = "Contador";
        salida.println("<TITLE>" + titulo + "</TITLE>\n<BODY>");
        salida.println("<H1 ALIGN=CENTER>" + titulo + "</H1>\n\n");

        // Insert a new string into the array
        contador[indice++] = "Numero " + indice;

        // Show the full array
        for (int i = 0; i < indice; i++) {
            salida.println(contador[i] + "<br>");
        }

        salida.println("</BODY></HTML>");
    }
}
```
